OSHA Awareness: Highlights the rights and responsibilities of job safety and health laws for both employees and employers and is designed for those responsible for safety in their organization including: Safety managers - Safety committee members - Risk managers - HR professionals - Facility managers - Chief engineers - General Managers - Department heads

USS Training will help them understand what OSHA compliance means to your organization, to discover how to answer OSHA-compliance questions and to identify your employee training and right-to-know responsibilities. This guides your company to reduce costly injuries and illness in the workplace as well as avoid stressful and expensive OSHA audits.

USS Training reviews the following: OSHA Standards that specifically apply for General Industry or Construction will be highlighted as attendees learn to develop and implement a Proactive Safety Program (PSP) that will better protect employees, increase productivity and improve relationships with employees as they are better protected. Companies will limit negative publicity from workplace injuries and illnesses and reduce your workers comp and liability insurance costs.

USS Training Topics include, but are not limited to: Learn to research OSHA and discover the most frequently cited OSHA violations in your business – Leadership Organizational Commitment - Safety Management - Effective Employee Training & Documentation – Measuring Your Success With Safety Goals - The OSHA Audit - Become OSHA compliant – Required training for employees – The benefits of a safety program - Employee injury in the workplace - Step-by-step program to develop your own site-specific written safety program as required by OSHA law - The OSHA Inspection Process – Hazard Identification and Assessment – Hazard Control – Program Administration Review and Follow up – Emergency Response Planning – Worker Competency and Training – Accident Incident Investigation – On-going Worksite Inspection / Observation

Additional Topics:

- Personal Protective Equipment (PPE) and exemptions
- Identifying Safety and Health Problems in the Workplace
- Common Health Hazards: Chemical - Biological - Physical - Ergonomics or Repetitive Strain Injuries - Psychological (stress).
- Health hazards to your body: Breathing - Swallowing - Skin – Cuts - Possibility of cancer - sensitization and possible reproductive effects for both men and women.
- Safety hazards common to many workplace environments: Slips, trips and falls – Being Caught In or Struck By Moving Machinery/Objects - Fire and Explosions - Transportation and Vehicle-Related Accidents - Confined Spaces - Violence
- Whistleblower Rights
- Refusing to Work Because Conditions are Dangerous
- Filing an OSHA Complaint
